M. P. NICHOLS,

TOWN TREASURER.

Merrimack, March 1, 1883.

We have examined the above report of the Treasurer of the town of Merrimack and find it correctly cast and properly vouched,

WILLIAM M. WEST,

GEORGE W. DARRAH,

AUDITORS OF MERRIMACK.

Merrimack, March 1, 1883.

ANNUAL REPORT
OF THE
SCHOOL COMMITTEE
OF THE
TOWN OF MERRIMACK,
FOR THE
SCHOOL YEAR 1882-83.

NASHUA:
M. V. B. GREENE, PRINTER, STATIONER AND BINDER.
1883.

REPORT.

The following is the report of your committee, and is respectfully submitted.

In submitting the annual report in this form, your committee is well aware, that it is not in accordance with the views of many, who are of the opinion that the schools should be spoken of by districts.

What benefit would there be to any one for a committee to find fault with or praise a teacher or school through a report?

The schools have been as successful as they could be under the existing system and a fair amount of work has been accomplished in most of the schools.

Some districts have had so little schooling that it must seem to parents and scholars as though the vacation would never have an end. With the amount of money expended annually for schools we should have at least thirty weeks for each school during the year; what we have had is an average of twenty-two and seven-tenths (22.7) weeks; every scholar is by right entitled to an equal chance, and you cannot give it to them in any other way than by having an equal number of weeks and employing trained teachers in all of the schools and be willing to pay a fair price for the same.

Too many of our teachers are working in the school-room because it is seemingly a little more respectable than work in the kitchen or shop. Many of our teachers are unfit by reason of temperament or lack of training for the management of the young, "as a twig is bent so is the tree inclined." Our little children want the very best of guidance in their first years of life so that when they take our places, as they soon must, they may be better fitted than we to do the

great work of making the world better for having lived in it.

The greatest care should be used in selecting teachers; there is no economy in hiring them because you can obtain their services cheaply. Skilled labor commands more pay than unskilled, and we should be willing to give a fair price for those who fit themselves specially as teachers. We have a State Normal School for the training of teachers, but we do not pay wages sufficient to secure the services of its graduates. The better the teacher the better the school, and it is our own fault if our schools are below the average.

During three weeks of the summer a "Teachers' institute" was held at Reed's Ferry. The services of Prof. H. P. Warren, Principal, and Miss E. M. Reed, critic teacher, were obtained to illustrate the most approved practical methods of teaching, and of the eleven teachers employed in our schools at the time only four attended.

The marked improvement of the schools since taught by those four ladies show the value of the work of the "Institute" and the necessity of our teachers attending like schools.

Districts Nos. 1 and 4 raised an extra sum of \$40.00 each for schooling.

In District No. 8, \$100.00 was raised and expended for repairs and in such a judicious manner that the school-house is scarcely recognizable outside or inside.

The school-house in District No. 7 is unfit for school purposes and should be repaired at once, or what would be better, build a new house.

Districts Nos. 2, 5, 7, and 9 are insufficiently supplied with black-boards, and nearly all of the school-rooms lack proper means of ventilation.

Again allow me to call your attention to Districts Nos. 10 and 11, in the first named we expended \$56.31, this sum being the apportionment, and no scholars in the District from this town.

In No. 11, the Summer term commenced with four pupils and closed with none, they leaving one by one until the teacher was without a pupil. The Winter term had four pupils, two of whom came from Nashua. The amount of school money in this district was \$132.41.

The special appropriation of \$65.00, with the balance \$10.42 of last year, making a total of \$75.42, has been expended as follows:

11 Zell's Condensed Cyclopedia,	\$39 25
9 Eight day clocks,	36 17
Total	\$75 42

The cyclopedia have been placed in all of the school-rooms excepting No. 10.

The clocks have been placed in the following districts, namely, Nos. 1, 2, 5, 6, 7, 8, 9, 11, and 12.

The sum of fifty dollars is asked for the coming year to be expended for supplementary reading for the schools.

You are again called upon to vote to abolish this present school system and adopt the town plan, give it your most careful thought and attention.

The whole number of children between the ages of five and fifteen, on the first day of April, as collected by the committee, was one hundred and seventy-one, numbered in the several districts as follows:

District No.	1.	.	.	.	.	9
"	"	2,	.	.	.	13
"	"	3,	.	.	.	33
"	"	4,	.	.	.	13
